HD-HWD VACUUM CLEANERS RANGE

soteco™

UP TO 100% RECYCLED PLASTIC

Our designers have developed an innovative and fully equipped product range ideal for professional cleaning. The certification of recycled plastic content in our products is a consistent consequence of transparent documentation and high control of supply chain, processing and production of our products.

Through the IPC exclusive black is green technology, these new eco-friendly products have been created with high quality recycled plastic, promoting sustainable development and environmental protection.

HOW TO KNOW THE CONTENT OF RECYCLED PLASTIC

The percentage of recycled plastic can vary from product to product or according to its configuration.

The recycled plastic content in Black is Green IPC products can vary from a minimum of 15% to a maximum of 100%.

It is possible to request documentation on the recycled plastic content indicating the specific product of interest.

BENEFITS

- O1 Black is Green TM recycled plastic is a raw material made of the best and strictly selected plastic waste.

 Black is Green TM is the result of an innovative process which guarantees the features of the brand new and high quality plastic, in the total respect of the environment
- Recycled plastic produces no waste, it is recyclable and in compliance with RoHS and REACH guidelines
- The minimum content of recycled plastic in the products and the production process of the "Black is Green" plastic are certified by a third party, in compliance with international regulations
- The use of recycled plastic content in cleaning products is recognized in public tenders as a rewarding green requirement

LIGHT AND TOUGH

The AP Tube is an innovative solution to simplify the daily cleaning activities. The APTube is lightweight and at the same time extremely robust, consisting of an inner layer of aluminum covered with a recycled plastic layer.

AP Tube is wear-resistant (Rust-proof), ergonomic and it ensures maximum maneuverability.

BENEFITS

Mix of plastic and aluminium PLUS OF ALUMINIUM:

- Lightweight
- Mechanical resistance
- Air friction reduced

PLUS OF PLASTIC:

- Anti slip
- Thermal protection
- Corrosion proof

Easy removable when turning the two wands,but strong connected if pulled

CERTIFIED ANTIBACTERIAL TREATMENT

The antibacterial treatment of the filters with silver ions (Ag+ ions) destroys bacteria's membrane cell, fungus, viruses, microparasites and inhibits their proliferation.

BENEFITS

Good cleaning resistance, up to 5 washes at low temperature (T=40°C)

Immediate and effective action on the collected material avoiding bacteria re-emission in the exhaust air

Antibacterial activity against both Staphylococcus Aureus and Klebsiella Pneumoniaes verified according to the JIS L 1902:2008 International Standard

MAXIMUM SEAL

The innovative head gasket is melted in the base through a special process that guarantees maximum resistance and durability even when vacuuming oily or chemical residues. Steel tank models include an integrated metal plate to avoid electrostatic discharges.

BENEFITS

Extremely durable also to chemicals

Maximum seal: no loss of airflow during suction

Easy maintenance: easy to clean and wear- resistant.

EXTREMELY FLEXIBLE

Unbreakable hooks are extremely flexible and resistant to any type of torsion thanks to a special blend.

BENEFITS

01

0

Twist-proof Shock resistant

03

Super flexible

04

Fast latching

HOSE ALWAYS FASTENED

The screwing connection of the flexible hose to the wand allows to work in maximum safety, avoiding damages and preventing the uncoupling of the hose.

BENEFITS

01

Great maneuverability

02

Maximum safety during cleaning

BEST PERFORMANCE WITH LESS ENERGY CONSUMPTIONS

The new only dry vacuum cleaners have been designed for cleaning specialists and contract cleaners by ensuring high productivity and cost savings.

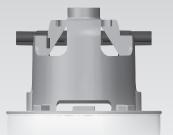

FOR MORE

BENEFITS

- 01 Best performances with maximum energy saving
- O2 Powerful and combinable nozzle for an high cleaning efficacy with less sliding friction force
- 03 High Efficiency filtration system and low noise level
- 04 Long-lasting motors and oscillation-resistant flexible hoses (up to more than 40.000 oscillations)

BEST PERFORMANCE WITH MAXIMUM ENERGY SAVING

A new generation motor which ensures maximum energy-saving, providing best performance, reliability and great efficiency.

BENEFITS

Energy consumption less than 32 kWh/year

Advanced mechanical design ensuring no loss in performance

Durability up to 800 hours

04 Silent

POWERFUL COMBI NOZZLE FOR HIGHLY CLEANING EFFICACY

Powerful nozzles for high cleaning efficacy, properly designed to reduce energy consumption and ensure minimum user effort.

BENEFITS

New ABS base plate for maximum suction efficiency on carpets and hard floor surfaces with low noise level

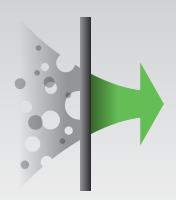

Anti trace wheels designed to improve the sliding of

floor nozzle

Optimization of extraction pipe and retractable bristles duty employments

Robust structure for heavy

HIGH EFFICIENCY FILTRATION

High Efficiency Filtration and containment (class M certified).

BENEFITS

Great resistance to rips and ruptures

Safe containment of fine dust to avoid inhalation during disposal

Reduction of dust re-emissions in exhausting air

NOISE REDUCTION

"Speed variator" function allows user to reduce noise level during usage in areas where silence is a must. The high efficiency of our system guarantees a good performance maintenance and avoids work interruption.

BENEFITS

Allows motor rpm (noise level) adjustment, when necessary

Easy to use: just turn the control knob to adjust noise level

MAKE THE WORK COMFORTABLE

Through an accurate field-based research of both professionals and users, we developed a number of suitable solutions to improve comfort andergonomics of our new generation of "dry only" models.

BENEFITS

Integrated housing for cable New handle with parking

position for extension tube

Easy filter replacement without tools

New bumpers to prevent damages or latches disconnection

WARNING LIGHT FOR FILTER REPLACEMENT

A warning light connected to an integrated sensor alerts the user if there is a clogging issue or if filter is full. This prevents motor and filters damages and reduces dust re-emissions.

BENEFITS

When the light is on, check the filter. If it is full/clogged, you should replace/ wash it.

RELIABLE AND DURABLE

IPC Premium Wet & Dry vacuum cleaners are equipped with the best double stage motors of the market, for higher reliability, also in heavy duty applications, and intensive use with overall longer lifespan.

GREATEST PERFORMANCES

MAXIMUM
RELIABILITY
& DURABILITY

BENEFITS

- 01 Motor designed with double fan in series, to achieve higher waterlift value up to 2470 mmH₂0
- The most known and used by-pass motor of the market with proven excellent results
- 03 Extremely high-performance motor throughout its working life, up to 800 hours

ALWAYS PERFORMANT

2 motors and 3 motors equipped machines have special valves allowing the separate start of the motors without any power loss. This function allows the operator to adjust the power according to the specific use and have a spare motor. Light indicators show how many motors are running and alert if there is any breakdown of the power cord.

BENEFITS

01

Power selection according to usage

02 Possibility to have a ready-to-use spare motor

FOAM & LIQUIDS STOP

Wet & Dry vacuum cleaners are equipped with a special device - the Integrated Anti-Foam System - which protects the floater from foam. The floater detects and blocks liquids when tank is full; thanks to its watertight rubber seal, this innovative system protects the motor ensuring maximum safety.

BENEFITS

01

The Integrated Anti-Foam System guarantees the correct floater operation mode

02

The floater detects and blocks liquids when tank is full

0.3

The motor is protected by the floater

EASY EMPTYING OF THE TANK

Wet & Dry vacuum cleaners with large capacity are equipped with drain valve device to facilitate tank emptying.

BENEFITS

01

Possibility to empty the tank from liquids

02

User-friendly design

EVEN FASTER TO EMPTY THE TANK

Wet & Dry vacuum cleaners with large capacity are equipped with tipping tank system and a front handle to make emptying operations even ore easy and fast.

BENEFITS

01 Ideal for large quantities of liquids 02 Designed for working efficiently and in total safety

ONLY ONE WET & DRY HEPA FILTERING SYSTEM

The special upstream filter cartridge, made of wet resistant polyester layer and HEPA H14 efficiency filtering media, stops solid particles that could escape during liquid collection.

BENEFITS

01
DFS is practical and
useful system: no need to remove the
filter during liquids suction

DFS is versatile: you can vacuum both dust and liquids

03
HEPA H14 filtering media stops fine particles or aerosol to protect motors, operators and environment.
