Why SAFE-T-IMOP?

Faster

Saves up to 50% cleaning time compared to flat mopping.

Cleaner

Superior mechanical action proven to remove up to 50% more contamination than mops.

Greener

No more single use mops waste and less chemical usage.

Safer

Less shutdown time for the cleanroom due to fast drying in seconds and no extra exhaust, thanks to ULPA filtration.

Better for everyone

Ergonomic operation reduces stress and strain for the cleaner's body.

SAFE-T-IMOP

for Proven Performance

SAFE-T-IMOP delivers on promise to reduce the risk of contamination in critical and controlled environments.

Thorough cleaning:

Removes more embedded contamination than manual cleaning. Fast drying and no residue.

Uncompromised performance:

Preserve and renew the unique properties of your sticky floors for lasting functionality.

Effortless experience:

Enjoy a user-friendly design that simplifies the cleaning process.

1. Yellow color

to clearly identify that this is a clean room machine, do not remove.

2. i-link IoT system

for remote management.

3. Black tank

infused with carbon for electrostatic discharge (ESD) and is treated with Microban® for antimicrobial protection.

4. Brushless vacuum motor

prevents airborne particles

5. Soft brushes

for no damage to clean room or sticky floor. Optional pads available

6. Primothane squeegee and splash guard

for chemical resistance and to control airborne particles.

7. FKM Anti-corrosion wheels

8. Replaceable ULPA 15 air filter

M24.000061.01.EN - Subject to change.

SAFE-T-IMOP special features:

No downtime and safer with plug and play batteries.

The control panel is easy to use, no training required.

Perfect for cleaning and renewing sticky mats.
